distribution

**savings do pay**

Our proven systems generate energy at a very efficient ratio. Therefore, your yearly savings will give you an excellent return on your investment.

Low maintenance costs, updated standards and intelligent service requirements will add to your savings and improve your facility's comfort.

**interest free loan**

As a result of your increased energy efficiency and the reduced fuel consumption, which both will reduce your carbon emissions, you are able to apply for an interest free loan. We will assist you with the application and throughout the process.

**questionnaire**

Please find enclosed a questionnaire developed by rockenergy for hotels and related businesses.

Please complete the form as much as possible and return it to us via email, fax or post. We will calculate your likely annual savings, the necessary investment required and the possible loan amount based on your carbon emission savings.

**This service is free of charge and does not commit you to any expense or obligation.**

**pressurized hot + cold water**

All our systems allow pressurized hot+cold water supply – guaranteeing controlled and accurate supply and consumption throughout your facility.

**efficiency**

The efficiency rate of our installed systems will rank top for many years to come. Our systems are future oriented and flexible; thus they will prepare your facilities to cope with a variety of challenges such as fuel efficiency, CO2 emission and carbon footprint regulations.

You will qualify for green and sustainable tourism programs.

**technology**

rockenergy has developed the habit of looking across methods and systems and beyond technology and markets.

The results are state-of-the-art systems, individually adapted that answer today's and – very important – tomorrow's needs.

**Efficiency meets Sustainability**

In case the questionnaire is not attached please visit our website [www.rockenergy.co.uk/hotel](http://www.rockenergy.co.uk/hotel)
